

```
SELECT datos_persona.codigo_tarjeta, datos_persona.nombres, registros.hora_fecha, roles.rol, areas.areas, transporte.tipo, registros.id_status FROM datos_persona, registros, transporte, roles, areas WHERE datos_persona.codigo_tarjeta='201050215' AND registros.id_persona = datos_persona.id AND datos_persona.id_roles = roles.id AND areas.id = datos_persona.id_area AND transporte.id = registros.id_transporte ORDER BY registros.hora_fecha DESC ;
```

```
SELECT datos_persona.codigo_tarjeta, datos_persona.nombres, registros.hora_fecha, roles.rol, areas.areas, transporte.tipo, registros.id_status FROM datos_persona, registros, transporte, roles, areas WHERE registros.id_persona = datos_persona.id AND datos_persona.id_roles = roles.id AND areas.id = datos_persona.id_area AND transporte.id = registros.id_transporte ORDER BY registros.hora_fecha DESC LIMIT 10
```

The screenshot shows the MySQL Workbench interface. The left sidebar contains the 'MANAGEMENT' and 'SCHEMAS' panels. The 'SCHEMAS' panel shows the 'itpa' database with tables, views, stored procedures, and functions. The main window displays a query result grid for the query: `SELECT * FROM datos_persona, registros, transporte, roles, areas WHERE registros.id_persona = datos_persona.id AND datos_persona.id_roles = roles.id AND areas.id = datos_persona.id_area AND transporte.id = registros.id_transporte ORDER BY registros.hora_fecha DESC LIMIT 10`. The result grid shows 10 rows of data with columns: `codigo_tarjeta`, `nombres`, `hora_fecha`, `rol`, `areas`, `tipo`, and `id_status`.
